PROFESSIONAL SUMMARY

Results-driven Front-end developer with a B.S. in Computer Engineering and hands-on experience building responsive, component-driven React applications. Delivered three production-deployed projects covering state management, client-side routing, Adept at translating UI/UX designs into clean, reusable, and maintainable code across the full software development life cycle (SDLC). Proven ability to adapt quickly, with minimal supervision, and contribute to continuous process improvement in cross-functional environments.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript (in progress), HTML5, CSS3, Python

Frameworks & Libraries: React.js (Hooks, React, Router), component base architecture

Backend / DB: Supabase (database, auth, realtime)

Tools: Git, GitHub, Vercel, npm, VS Code, Vite

Principles: Responsive design, reusable components, cross-browser compatibility, SLDC, UI/UX

Soft Skills: Analytical thinking, documentation, cross-team collaboration, attention to detail

PROJECTS

Personal Portfolio | HTML, CSS, JavaScript, Vercel, Responsive Design

my-portfolio-hazel-three-80.vercel.app

- Engineered a fully responsive, portfolio in Using HTML, CSS, and JavaScript, achieving consistent rendering across 5+ tested browsers and screen sizes.
- Configured continuous deployment via GitHub into vercel, cutting deployment time to under 2 minutes and enabling zero-downtime updates.

Flashcard Study App | React, JavaScript, State Management

flash-card-app-black.vercel.app

- Built a library of fully reusable React components with CSS card-flip animations, reducing future feature development effort by an estimated 50% through modular, extensible design.
- Implemented React Hooks (useState, useEffect) for robust state management, resulting in smooth UI transitions with no perceptible re-render lag across devices.

Blog Site | React, JavaScript, Routing

myblogapp-blue.vercel.app

- Developed a full-featured blog website integrating client-side routing (React Router) and Supabase REST API for post creation, listing, and content rendering.
- Applied clean code conventions, and consistent naming standards, resulting in a codebase maintainable with zero onboarding documentation.

WORK EXPERIENCE

Junior Auditor | Philippine Batteries Inc., Santa Maria, Bulacan

May 2025 – Sep 2025

- Executed structured internal audit-workflows in collaboration with senior auditors, developing meticulous documentation and data-accuracy habits directly applicable to review and sprint QA delivery.

Station Supervisor | Rephil Group of Companies, Santa Maria, Bulacan

Nov 2023 – Aug 2024

- Led a team of 8+ staff to consistently hit daily performance targets, building cross-functional collaboration, task prioritizations, and accountability skills directly transferable to agile sprint environments.
- Onboarding and trained new team members by breaking down complex process into clear steps, demonstrating the communication clarity essential for technical documentation and review feedback.
- Produced detailed daily operations and sales reports, reinforcing analytical precision and structured data communication relevant to technical delivery workflows.

EDUCATION

Bachelor of Science in Computer Engineering

STI College Sta. Maria, Santa Maria, Bulacan

Jul 2018 – Aug 2022
